

**STABILIZING FORMULATION FOR IMMUNOGLOBULINS G COMPOSITIONS  
IN LIQUID FORM AND IN LYOPHILISED FORM**

**ABSTRACT**

This invention is related to a stabilising formulation for immunoglobulins G compositions comprising a sugar alcohol, glycine and a non-ionic detergent, which is suitable for the stabilisation of immunoglobulins G compositions in liquid form and in lyophilised form. The invention also relates to an immunoglobulins G composition in liquid form or in lyophilised form comprising said stabilising formulation.
